MANU PRATAP SINGH

Product Manager, AI Strategy | 0→1 platforms in AdTech, Gaming and SaaS | The Lisbon MBA 2026
Lisbon, Portugal | +351 920 735 573 | sam123.manu@gmail.com | linkedin.com/in/pratapmanusingh

SUMMARY

I am a product manager with 4+ years building consumer and B2B platforms from zero to scale: an ad exchange architected for 100M+ monthly impressions with $100k/month in ad spend running through it, and a gaming app I grew to 1M+ users. I now lead AI strategy, product quality and company direction at a CRM and automation company while finishing The Lisbon MBA. I have an engineering degree, I read API documentation and turn it into build plans for developers, and I have hired and led cross-functional teams.

EDUCATION

The Lisbon MBA International – Católica | Nova — Lisbon, Jan – Dec 2026
MIT Sloan Summer Immersion Certificate — Boston, Jun 2026
B.Tech, Information Technology, minor in Digital Marketing – Manipal Institute of Technology — India, 2016 – 2020

EXPERIENCE

Product Manager, AI Strategy — Aug 2026 – present
MR Neo · Remote, India · business automation and CRM platform, part-time alongside the MBA

- I audited the whole 60+ page platform, logging 500–600 bugs and UX issues, and turned my own testing method into reusable AI skills the whole team now uses.
- I unblocked a Shopify integration the developers had been stuck on for a month by speccing the integration hub, the APIs to use and the build steps; it is built and approved.
- I made the company AI-native in under two months with a central knowledge base, a sales AI workspace and automated workflows, cutting deck revisions to 1–2 iterations and removing information lag across teams.
- I reset pricing and positioning, adding try-before-you-upgrade add-ons and moving the company from "a CRM/CPaaS" to helping customers grow their business; I now lead its redesign into an AI-first platform.

Product Manager, Product & Platform — Aug 2023 – Jan 2025
XY ADS · Gurgaon, India · performance marketing agency and GMNG's parent company

- I built a self-service ad exchange from scratch for small businesses that found agency-grade platforms too complex; $100k/month in ad spend ran through it by the time I left, and one client grew to $30k/month.
- I wrote API-level OpenRTB PRDs, architected the platform for 100M+ monthly impressions, and integrated DSPs and SSPs by breaking each partner's API docs into the exact APIs developers had to build.
- I interviewed and hired the team (3 developers and the designer), cut operating costs 15% through long-term, volume-based vendor contracts, and implemented role-based access for agency teams.

Product Manager (promoted from Associate PM within 11 months) — Feb 2021 – Jul 2023
GMNG · Gurgaon, India · real-money mobile gaming platform; I led a team of 8–9 developers, support and sales

- I grew the platform to 1M+ users and $500k+ in user deposits.
- I tripled gameplay frequency and lifted revenue 50% in key games by adding games, a 7-day habit-forming poker loop and UI changes such as pinned favourites and faster loading; the loop alone converted 60% of its cohort for $40,000 in revenue.
- I designed "Everybody Wins", a second-chance model for new players' first real-money game, lifting new-user retention 30%, and cut sign-up drop-off by about 60% with a one-field phone and OTP sign-up.
- I designed a deposit-linked, two-tier referral programme that brought in 200,000+ new users in one month.
- I turned the parent agency's paid-install campaigns into an in-game Offer Wall, then packaged it as a B2B SaaS module licensed to 3–4 gaming companies (~$5–6k/month).

2025 — Feb – Dec 2025
I prepared for the GMAT and applied to MBA programmes; I was admitted to The Lisbon MBA (Jan 2026).

MBA PROJECT

Sovena – Summer internship — Lisbon, Jul – Aug 2026

- I reviewed a 59-SKU tea portfolio with surveys and social listening, recommended repositioning from health claims to consumption occasions, presented to the director, and handed over a queryable AI research base (NotebookLM).

SKILLS AND ADDITIONAL

Product: product strategy, 0→1 platform builds, PRDs, product QA and UX audits, integrations, pricing and positioning, user growth and retention, hiring and leading cross-functional teams

AI and technical: AI strategy and adoption, AI knowledge bases and skills, AI-assisted prototyping, APIs, OpenRTB, RBAC, SQL, Jira, Figma, Postman, Claude; ML Foundations for PMs (Duke, 2025)

Languages and interests: English (proficient), Hindi (native); 50m rifle shooting (national level), mixed martial arts, travel
