SUMMARY

MBA candidate with four years building and fixing digital businesses from the inside: a self-service ad exchange carrying $100k/month in ad spend, a real-money gaming app grown to 1M+ users, and now pricing, positioning and AI adoption at a CRM and automation company. Customer- and data-led problem solver.

EDUCATION

The Lisbon MBA International - Católica | Nova (Lisbon, Portugal), January 2026 - December 2026.

- Sovena (internship, Jul - Aug 2026): Reviewed a 59-SKU tea portfolio using surveys and social listening; recommended repositioning from health claims to consumption occasions and presented to the director.

MIT Sloan Summer Immersion Certificate - (Boston, US), June 2026: Technological Innovation, Global Strategy.
B.Tech in Information Technology, minor in Digital Marketing - Manipal Institute of Technology (India), October 2020.

WORK EXPERIENCE

August 2026 - Present | **MR Neo (Remote, India)**
Product Manager - AI Strategy, part-time alongside the MBA

- Benchmarked competitors for the founder of this CRM and automation platform and introduced a new pricing model (try-before-you-upgrade add-ons) and a repositioning from software vendor to business-growth partner.
- Set up the company's AI workflows in two months (shared knowledge base, sales AI workspace, automated tasks), cutting sales-deck revisions to two rounds at most.
- Audited the 60+ page product, logging 600 bugs and UX issues; unblocked a Shopify integration the developers had been stuck on for a month by speccing the integration hub, API choice and build steps.

August 2023 - January 2025 | **XY - ADS (Gurgaon, India)**
Product Manager - Product & Platform

- Retained by the parent agency as GMNG's only employee after its shutdown; wrote the product specifications and architected its new ad exchange for 100M+ monthly impressions.
- Built the exchange from scratch as a self-service tool for small businesses, filling a gap left by agency-focused platforms; $100k/month in ad spend by January 2025, one client at $30k/month.
- Hired and led a team of three developers and a designer, and planned the integrations with advertising partners.
- Cut operating costs 15% by benchmarking vendors and moving them to long-term, tiered, volume-based contracts, and gave sales a phased roadmap and competitive analysis to sell the platform.

February 2022 - July 2023 | **GMNG (Gurgaon, India)**
Product Manager - Product & Platform

- Led a team of nine on a real-money gaming platform that grew to 1M+ users; tripled gameplay frequency and lifted revenue 50% in key games via more games, a 7-day poker loop, pinned favourites and faster loading.
- Resolved a deposit drop-off by testing the card-payment assumption with customers, finding 80% used Paytm (a local mobile wallet), and moving the payment gateway to it.
- Designed a deposit-linked, two-tier referral programme that added 200,000+ users in one month, and cut sign-up drop-off by about 60% with a one-field, phone-number sign-up.
- Turned the parent agency's paid-install campaigns into an in-game Offer Wall, then packaged it as a B2B SaaS module licensed to 4 gaming companies (~$6k/month).

February 2021 - January 2022 | **GMNG (Gurgaon, India)**
Associate Product Manager - Product & Platform

- Traced new-player churn to loss aversion and designed "Everybody Wins", a second chance after a first loss, lifting new-user retention 30%.
- Onboarded strategic partnerships with Dream11 and Pocket52 and contributed to shareholder presentations that secured $100,000 in development funding; promoted to Product Manager within 11 months.

SKILLS & LANGUAGES

Hindi: native | **English:** fluent
Business: growth strategy, pricing, customer research, unit economics | **Technical:** APIs, SQL, Jira, Figma.
AI: Claude, Claude Code, NotebookLM; built AI knowledge bases and automated workflows for sales and product.
